Request for Proposals

The Colorado Commission on Higher Education (CCHE) solicits proposals for grants designed to expand the use of open educational resources (OER) across public postsecondary institutions in the state. The deadline to submit a proposal for consideration is **Monday, September 15, 2025**.

Purpose

[Senate Bill 21-215](#) and the associated appropriation provide funding for expanding the use of open education resources (OER) in Colorado. The Colorado OER Council, established by legislation, advises the Department of Higher Education on expanding the use of OER in public institutions of higher education around the state, including through the awarding and tracking of grant funds to create, adapt, adopt, and promote the use of OER. Proposals are solicited for funding: from public institutions of higher education to support creation, adoption, adaptation, expansion, and promotion of the use of OER across the institution and among multiple institutions; and from faculty, instructors and/or staff of public institutions of higher education, individually or in collaborative groups, to support the creation, adoption, adaptation, expansion, and promotion of OER for specific courses, disciplines, or programs.

Grant Outcomes

The 2025-26 Cohort 8 Colorado OER Grant Program is anticipated to:

- Raise awareness of OER among faculty, staff, and students in the state of Colorado;
- Provide up to \$1,000,000 in funding to institutions, faculty, and staff to support and expand creation, adoption, adaptation, expansion, and promotion of the use of OER in the state of Colorado;
- Save students at Colorado's public institutions of higher education at least \$2 million in textbook costs in the academic year 2026-2027;
- Advance student learning through improved collaboration, engagement, responsiveness, and curricular relevancy;
- Create multiple new z-degree pathways or allow for completion of z-degrees already under development for Colorado students to complete their degree with zero textbook cost; and
- Demonstrate the evolution of Open Education in Colorado and evaluate the impact and benefit of Open Education to students and communities in terms of learning, culturally relevant resources and practices, and more.

COLORADO

Department of
Higher Education

Process and Key Dates

Applications in response to the request for proposals (RFP) will be accepted beginning **August 15, 2025**. CDHE staff will host a series of webinars April - June 2025 with the opportunity for scheduled office hours until September 2025 to provide guidance on applications and answer questions about the requirements of this grant program. The deadline for proposals to be submitted is **September 15, 2025**.

Members of the Colorado OER Council and designees will review proposals and make recommendations to the CCHE by November 2025. CDHE staff will bring OER Council recommendations for review and approval from the Commission at the December 2025 CCHE meeting. Funds will be dispersed by the CDHE in January 2026. All funds must be expended by June 30, 2027.

Grantees must submit progress reports to CDHE in December 2026 and a final report in February 2028. Unexpended funds are required to be returned to CDHE in July 2027.

Note: In order to avoid conflicts of interest, OER Council members will recuse themselves from reviewing and/or recommending proposals which they have written and/or grant proposals originating from their home institutions.

Instructions for Proposal Submission

All proposals should be emailed to **OER@dhe.state.co.us** as a **single attachment PDF by 5 p.m. MDT on Monday, September 15, 2025**.

The proposal must be submitted as one PDF document and included as one attachment in the submission email, including any letters of support. Supplemental files will not be considered, but proposals may contain links to relevant information or examples. **Applicants should write their proposals toward [the rubric](#) in order to have a successful grant application. Proposals that do not address the rubric and do not utilize the supplied template will not be considered by the grant review committee.**

Additionally, all applicants must complete a [proposal contact form](#) to provide the name, title, institutional affiliation, and email of the project lead, and any additional grant contacts.

Grant Award Categories

The Colorado OER Grant Program will fund six types of grants with a total allocation of \$1,000,000 for the 2025/26 Cohort 8 grant cycle. The \$1 million in funding for the cycle 8 OER grants will be distributed to prioritize the funding of z-degrees and collaborative grants. **The Colorado OER Council aims to award at least \$500,000 in grant funding to z-degree and collaborative proposals.**

COLORADO

Department of
Higher Education

All grant categories, with the exception of general incentive fund proposals, must specify the grant's collaborators, courses, and/or committed instructors. All grant categories, with the exception of individual project grants, must show evidence of multiple instructors/collaborators executing the grant projects. All proposals are evaluated individually, but the OER Council will take into consideration if other proposals are addressing the same courses, previously funded OER grant projects, and past grant/reporting performance of the institution. All projects will be considered, but projects for credit-bearing courses will be prioritized.

1: Institutional Z-degree

"Z-degrees" provide students with a Zero Textbook Cost (ZTC) pathway to complete their degree from start to finish with zero textbook cost. Z-degree grants will be awarded to institutions to convert degree coursework to OER through adoption, adaptation, or creation of OER. Z-degree grants will be awarded:

- **up to \$100,000** for proposals that will undertake a full z-degree addressing lower-level and upper-level courses for a degree; or
- **up to \$75,000** for an Associates degree, certificates, upper-level major coursework for a Bachelor's degree, or graduate degrees.

Z-degrees should offer students a realistic pathway to complete their degree with zero textbook cost. All required courses must regularly offer an OER or no-cost section, but it is not required that every course offered by a department use OER to be considered a z-degree for the grant program. Grant funds may be used to fund the time to adopt or develop OER or other open source resources, including textbooks, homework systems, videos, quizzes, simulations, and other ancillary materials. No-cost materials that are not openly licensed may be used in a z-degree, but grants may not be used to fund materials that are not openly licensed.

Z-degree proposals should provide a detailed plan for the work that will be undertaken in 2026-2027 toward a z-degree. It is unlikely that a single year grant could be used to design and implement a z-degree unless significant work has already been undertaken previously. Proposals should include an estimated timeline and courses in future phases, but are not required to have a detailed plan beyond the phase of the grant period. Institutions with in-progress z-degrees will be prioritized.

2: Collaborative Z-degree up to \$100,000

A "z-degree" that is achieved through collaboration between two or more institutions (**K-12 and private institutions are eligible with a lead applicant that is a public institution of higher education**) to adopt, adapt, and create OER with the express goal of establishing z-degrees at each participating institution.

Collaborative Z-degrees should offer students a realistic pathway to complete their degree with zero textbook cost. All required courses must regularly offer an OER or

COLORADO

Department of
Higher Education

no-cost section, but it is not required that every course offered by a department use OER to be considered a z-degree for the grant program. Grant funds may be used to fund the time to adopt or develop OER or other open source resources, including textbooks, homework systems, videos, quizzes, simulations, and other ancillary materials. No-cost materials that are not openly licensed may be used in a z-degree, but grants may not be used to fund materials that are not openly licensed.

Proposals must outline specific courses and have evidence of commitment by collaborating institutions and instructors. Proposals should provide a detailed plan for the work that will be undertaken in 2026-2027 toward a z-degree, and evidence of commitment by all participating institutions and applicable instructors. Proposals should include an estimated timeline and courses in any future phases, but are not required to have a detailed plan beyond the phase of the grant period.

3: Collaborative up to \$75,000

Grants awarded to two or more institutions (**K-12 and private institutions in Colorado are eligible with a lead applicant that is a public institution of higher education**) to adopt, adapt, and create OER with the plan to use the developed materials at each other's institutions at the conclusion of the grant. **Collaborative projects must provide a detailed plan with specific commitments from each institution, course, and instructors.**

Examples of collaborative projects include multiple universities and community colleges working together to create course materials that will be utilized across multiple institutions at the conclusion of the grant; a collaborative effort for developing materials to be piloted at a different institution; and collaborating with students or K-12 educators to develop materials that will be implemented at a K-12 institution and/or be used in concurrent enrollment programs.

4: General Incentive Fund up to \$50,000

Grants that will fund a general incentive or stipend grant program to be distributed by the institution to provide funds to educators to adopt, adapt, or create OER for two or more courses at the institution. Professional development funds may be requested, but must be specified in the proposal budget. Proposals can contain a list of determined courses, or simply a plan for which departments will be the focus on outreach initiatives with accompanying rationale for targeting those courses/programs.

General incentive fund grants are limited to a single institution. Proposals should follow the project funding activities outlined in the funding guidelines section for their incentive structures, or propose a similar structure. **This is the only category permitted to include a general incentive fund structure, or commonly referred to as “mini grants” at many institutions.** Institutions with **institution-wide** automatic textbook

COLORADO

Department of
Higher Education

billing programs **are not eligible** for the general incentive fund grants during this cycle.

5: Small Group up to \$25,000

Grants run by a small group of committed collaborators at a single institution to adopt, adapt, or create OER. Small group grants must include at least two faculty, instructors or staff, but are not limited to a single department. Small group projects may include working across departments at an institution, piloting OER work in a discipline as a potential z-degree, and projects outside credit-bearing courses. All projects will be considered, but projects for credit-bearing courses will be prioritized.

6: Individual Project up to \$10,000

Grants that will adopt, adapt, or create OER and/or ancillary materials by a single individual or for a single course. Individual projects must follow the project funding levels outlined in the funding guidelines section. The full amount of funding will only be awarded to projects that combine multiple funding activities into their project, such as review and development of ancillary materials in addition to authoring or adapting OER. All projects will be considered, but projects for credit-bearing courses will be prioritized. All courses from concurrent enrollment and undergraduate courses to specialized graduate level courses may be included in individual project grants.

If you have questions about the correct type of grant for your project, please contact **OER@dhe.state.co.us** prior to submitting the proposal. Proposals that do not meet the criteria for the grant category may be returned to the applicant(s).

Eligibility

Eligibility for the grant program is as follows:

- Grants are open to any public postsecondary institution in the state of Colorado as defined in C.R.S. Title 23, which is inclusive of institutional systems;
- Any faculty, instructor, or staff member employed by a public institution of higher education in the state of Colorado may be the lead-PI;
- Private institutions, or regional campus collaborations, and local K-12 school districts may be partners on a multi-institution collaborative grant with public institutions of higher education as the lead applicant that will directly receive funds.
- Returning grantees that are not in good standing with reporting requirements in the 2024/25 cohort 6 grant are not eligible to submit a proposal in this cycle. If an institution is not in good standing, individuals not associated with the prior grant are still eligible to submit proposals for consideration.
- Institutions with institution-wide automatic textbook billing programs, often referred to as inclusive access and equitable access programs, are not eligible for general incentive fund grants. **Institutions that exempt OER or other no-cost courses permanently**

COLORADO

Department of
Higher Education

from flat-fee automatic textbook billing programs, with evidence such as a negotiated contract with the automatic textbook billing program vendor, may contact CDHE at OER@dhe.state.co.us for the OER Council to consider reinstating their eligibility.

If you have questions about eligibility, please contact OER@dhe.state.co.us prior to submitting the proposal.

Funding Guidelines

- Grants will provide a single year of funding that must be spent by June 30, 2027.
- Grant funds may be used to fund the time to adopt or develop OER or other open source resources, including textbooks, homework systems, videos, quizzes, simulations, and other ancillary materials.
- Grant funding will not be allocated to cover full funding of full-time employee salaries, technology, equipment, e-book subscriptions, access codes, the purchase of any books, printing, or indirect costs.
- Grants may fund temporary part-time positions (20 hours per week or less), stipends for instructors or staff, and/or salary percentages. Proposals should follow the guidance for funding by project type and may structure payment methods based on project preferences or institutional guidelines.
- Professional development requests will be considered, but proposals must provide specific details and justification.
- Proposals that do not include a budget narrative will be returned.

If you have questions whether your proposal or a budget item is within funding guidelines, please contact OER@dhe.state.co.us prior to submitting the proposal.

Selection Criteria

In making recommendations and awarding grants, the OER Council and the Commission will consider whether the proposed grant-supported activity:

(i) affects courses with high student enrollment or high textbook or materials costs and/or advances the state's progress toward Zero Textbook Cost (ZTC) programs such as the creation of z-degrees, programs, certificates, pathways, courses, or sequences aimed at saving students money;

(ii) affects high-impact courses such as core courses, Guaranteed Transfer (GT) Pathways/General Education courses, courses within statewide transfer agreements, or courses included in concurrent enrollment agreements;

COLORADO

Department of
Higher Education

- (iii) supports adoption, adaptation and/or development of open educational resources by teams of faculty, librarians, and instructional designers within a public institution of higher education or across multiple institutions, making it more likely that the resources will be used in multiple courses or sections;
- (iv) includes a demonstrated commitment to and plan for accessibility and breadth of materials;
- (v) aligns with departmental, institutional and/or state mission, goals, or strategic initiatives;
- (vi) aligns with the current needs of higher education; and
- (vii) advances existing institutional OER programs and sustainable initiatives.

Proposal

Please submit all required sections of the proposal in **one document, not to exceed ten pages** (letters of support are not included in the ten page limit, but must be included at the end of the document). A completed cover sheet, completed Colorado OER agreement, narrative, timeline, and budget are required. The proposal narrative must be followed, but it is permitted to propose an alternative budget format. The agreement and templates are available in the [RFP public folder](#). Additionally, all applicants must complete a [proposal contact form](#) to provide the name and full contact details for the proposed project.

Proposal Criteria

All OER grant proposals will be evaluated on the following criteria and all proposals should include all applicable points in their proposal. **These criteria will be considered by the grant reviewers in evaluating and scoring your proposal. Omission of any of these points will lower your final score and affect the funding of your proposal.** In order to aid in successful proposals, the following list corresponds to the rubric items with denoted letters. Please write to [the rubric](#) to ensure the most successful proposal and explicitly address the following items:

- completed cover sheet that includes the project title, institutional affiliation, and contacts, and a completed Colorado OER Grant agreement **[a]**;
- project description that includes a clear overview of the OER project, the target population for the materials, the courses intended to be covered by the scope of the grant, and its team and/or project partners **[b]**;
- description of how the proposed project will positively impact student success **[c]**;
- plan to evaluate the grant that includes the number of students who are affected and the cost savings to students as a result of the open educational resources developed using the grant and/or the impact on student success, such as DFW rates, assessment of student learning outcomes, enrollment, impact on retention

COLORADO

Department of
Higher Education

- and persistence, costs of resources replaced, survey data on student performance, student success or satisfaction with the OER, etc. **[c, k]**;
- description of how the proposed work will lower student costs **[d]**;
 - description of how the proposed work impacts courses with high student enrollment or high textbook or materials costs and/or advances the state's progress toward Zero Textbook Cost (ZTC) programs such as the creation of z-degrees, programs, certificates, pathways, courses, or sequences aimed at saving students money **[e]**;
 - identification of any library, instructional design, information technology, instructional, or administrative staffing, including project partners, to support the open educational resources initiative for which a grant is requested **[f]**;
 - evidence of the existence of an open educational resources committee, whether formal or informal, or list of the personnel who will be involved in the proposed project **[f]**;
 - demonstrated support from departmental or institutional leadership, which may be submitted in the form of official letters of support **[f]**;
 - a realistic and detailed timeline for the project that includes creating OER content, implementing the OER materials, and evaluation of the effectiveness of the project **[g]**;
 - a plan for expanding the adoption, adaptation and/or creation of open educational resources across the campus(es) or institution(s) that receive(s) the grant, which may include awarding grants to faculty members, staff or faculty training and/or support, reducing a faculty member's required teaching hours, and/or providing other incentives to faculty for adapting and developing open educational resources **[g]**;
 - the manner in which the courses that use open educational resources will be identified for students prior to the time of course registration, which may include identification in the schedule of classes **[g]**;
 - the plan for ensuring that open educational resources that are adapted or developed using the grant money are discoverable, publicized, and made available to other faculty, staff, and students within the public institution of higher education and other public institutions of higher education in Colorado including a description of any open licensing, which is detailed in the Colorado OER agreement page **[g]**;
 - a plan for and commitment to sustaining the open educational resources initiative after the grant is completed **[g]**;
 - a demonstrated commitment to and plan for accessibility **[h]**;
 - a plan for commitment to accessibility in compliance with the Americans with Disabilities Act of 1990, 42 U.S.C. sec. 12101 et seq., as amended, and Colorado House Bill 21-1110 to enable persons with disabilities to access to the open educational resources developed or adapted using the grant **[h]**;

COLORADO

Department of
Higher Education

- a specific plan for how the OER initiative will be sustained after grant completion, including sufficient staffing, storage of materials, publicization of OER, and how the OER will be made publicly available **[i]**;
- a description of the manner in which the grant recipient will evaluate the use of the open educational resources developed using the grant, including a plan for the collection of relevant data, e.g. number of students affected, costs of resources replaced, survey data on student performance and/or satisfaction with the OER, support used in parts of the project, etc. **[j]**;
- identification of institutional research partners that will assist with evaluation **[f, j]**;
- a detailed budget plan describing utilization of grant funds **[i]**;
- evidence of institutional or department support, such as in-kind funds, library, and/or staff time contributions **[i]**;
- and letters of support.

Please refer to [the rubric](#) for more details on the selection criteria. The letter at the end of each required section and criteria (ex: **[a]**) corresponds to the selection criteria in the rubric for this grant cycle to aid in successful grant proposals.

Project Funding Activity Ranges

To ensure fair and consistent funding levels across projects, proposals in any category should use the funding ranges suggested here or should have a clear justification why the proposed project requires a different level of funding. These ranges should be used whether the institution uses stipends, a percentage of an employee's salary, course release, or some other method of compensation. However, an institution may propose a different funding structure with specific justifications.

The budget narrative in the proposal template requires specifying the amount of each funding component. Proposals may create their own alternative budget, but should follow a similar breakdown of requested funding. Proposals may contain multiple funding components, including funding for personnel not specified in the list below.

The activity ranges are general guidelines. Institutions may propose alternatives with justification. Applicants should contact OER@dhe.state.co.us with questions.

Activity 0: Training attendance (\$100 - \$1,000)

Funding to incentivize instructors to participate in open education trainings, such as an introductory training on OER, a series of workshops, or a faculty learning community. The amount specified in this range should reflect time commitment from the instructor with lower amounts being utilized for a short training and higher amounts used for semester-long commitments. Food for trainings may be requested on a separate budget line.

COLORADO

Department of
Higher Education

Activity 1: Review (\$250 - \$2,000)

Funding for institutional instructors, outside reviewers, students, and/or community members to review, test, or otherwise provide feedback about an OER. Funds may be requested for multiple reviews. Peer or student reviewers will most commonly be awarded in the range of \$250 - \$500. Amounts in the higher end of the range will likely be awarded for community reviews for created OER. Proposals should justify the need for multiple reviews, types of reviews, and the requested amount. Budgeted amounts for review should reflect the role of the reviewer and time commitment for the type of review.

Activity 2: Adopt as-is (\$1,500 - \$2,000)

Funding for an instructor to revise a syllabus, update assignments, etc. when adopting as-is an existing open educational resource for use in their course.

Activity 3: Customize and Remix Existing OER (\$1,750 - \$3,500)

Funding for an instructor to customize an existing open educational resource that they are *not already using* in their course. Minor updates include adding more inclusive language, inserting regional examples that are more relevant to Colorado students, or updating OER with more current information. Remix projects may take the form of splicing together chapters from multiple existing open textbooks or adding original content into an existing OER. The resulting OER is custom course content that better meets the learning objectives of a course. Projects that do not add original content to the remix should be funded on the lower end of the range. The requested funding amount should reflect the depth of remixing needed, the amount of any original contributions, and any updates required to the syllabus or assignments.

Funding also covers revising their syllabus, updating assignments, etc. when adopting the updated resource. Minor updates will typically be closer to \$1,750 and significant remix projects will be closer to \$3,500 within the \$1,750 - \$ 3,500 range.

Activity 4: Maintenance of currently used OER (\$1,000 - \$2,000)

Funding for an instructor to update the existing OER that they are *already using* in their course. This may apply to OER they adopted as-is or originally authored. Maintenance is most likely to apply for OER that needs updates to remain current due to new developments in the discipline, and may include funding to update course assignments in line with the OER maintenance. The requested funding amount should reflect the depth of maintenance.

Activity 5: Author new OER (\$3,000 - \$6,000)

Funding to create a new open textbook or similar substantial open educational resource. Proposals that include creation must demonstrate that authors have reviewed the available OER and that there are not quality OER currently available for the course content and/or to meet learning objectives. The requested funding amount should reflect

COLORADO

Department of
Higher Education

the depth of work required to author a new open educational resource with detailed justifications. New open textbooks may include multiple authors, but proposals should provide justification and the requested amount reflect individual contributions. Publishing is available at no-cost to authors through the [Colorado Pressbooks Network](#).

Activity 6: Develop ancillary materials (\$1,000 - \$10,000)

Funding for the development of open source supplemental materials, such as homework systems, quizzes, simulations, virtual labs, etc. All open source ancillary materials must be developed for courses that are using OER or have other no-cost materials to students. Proposals to develop ancillary materials for training or professional development outside of credit-bearing courses will be considered. Development of ancillary materials will not be supported for instructors who will be using the open source ancillary materials alongside a commercial textbook.

At the lower end of the range, projects are likely to require development time and resources, and contribute to the enhancement of course content and student engagement. Examples of projects at the lower end of the range include development of brief weekly quizzes, a single simulation, slide decks, short videos, and other ancillary materials.

At the higher end of the funding spectrum, projects likely involve extensive research, development, testing phases, and collaboration with subject matter experts or developers to ensure high quality and effectiveness of the materials. Examples of projects at the higher end of the range include development of homework systems, multiple simulations, high-quality video production, 3-D printed materials, and other ancillary materials.

The funding range is structured to accommodate projects of varying complexity and scale. The previous examples are illustrative. Some ancillary materials may fit in either the lower or higher end of the range depending on length and production time. All ancillary materials development projects will be considered, but successful proposals will provide detailed justification. Projects with ancillary development must provide a description of what materials will be created, estimation of time for development, and brief cost breakdown in their budget narrative

Activity 7: OER Staff Support (\$3,000 - \$25,000)

Funding for part-time, temporary staff support, such as an OER Assistant, OER Coordinator, or Student Fellow. Proposal should provide a paragraph job description, hourly wage, required fringe, number of hours per week, and number of weeks for the staff support. Part-time staff should not exceed an average of 20 hours a week. Proposals may include both part-time professional and/or student support. Additionally, proposals should provide a brief statement regarding the impact of the position.

COLORADO

Department of
Higher Education

Examples of part-time OER staff support positions in previously funded grants, include: OER Assistant or OER Coordinator funded at 15-20 hours a week for 36 weeks, project technicians specific to the technical work to execute the project funded at 20 hours a week for 52 weeks, and student workers funded for 5-15 hours a week each semester.

CDHE and the OER Council are establishing an OER Student Fellow program in 2025-26. Proposals may include an OER student fellow in addition to other part-time staff support positions. It is anticipated that OER Student Fellows will assist on OER projects and coordinate student advocacy for open education. Guidelines for OER Student Fellow are:

- Employed at a minimum of 5 hours per week for the duration of a semester or academic year
- Paid at minimum the standard, entry-level or student rate for the institution
- Enrolled as an undergraduate or graduate student at the institution
- Be available for 2 paid hours each month for professional development and/or meetings with other fellows

Applicants should consult their human resources for institutional guidelines on hiring, required fringe, and classification of part-time, temporary positions.

Proposal Templates

Proposals should follow the provided template and be submitted in a single PDF. The following templates are available in the [Colorado OER Grant 2025 RFP public folder](#):

- [OER Grant Proposal Template \[Google Doc\]](#)
- [OER Grant Proposal Template \[Word file\]](#)
- [Budget Template \[Google Sheet\]](#)
- [Budget Template \[Excel Sheet\]](#)

You may use whichever file format you prefer to draft the proposal, but it **must be submitted as a single PDF**. Proposals that do not utilize the template, are not submitted as a PDF, or include multiple attachments will be returned. Additionally, the public folder contains [the rubric](#) used to evaluate grants, informational webinars for the grants, glossary of terms, and sample OER grants that were previously successful.

Reporting and Evaluation Requirements

All successful grants must provide a progress and final report during the grant period. Applicants should plan for how they will evaluate the use of open educational resources developed as a result of the grant. This should include estimates for the number of students who are affected and the cost savings to students as a result of the open educational resources

COLORADO

**Department of
Higher Education**

developed using the grant. In addition to cost savings, other grant evaluation criteria may include the impact of using OER on student success. These can include, but are not limited to, DFW rates, assessment of student learning outcomes and student satisfaction, impact on retention and persistence or other student success measures.

Grant recipients are expected to participate in:

- reporting of selected data elements to CDHE to enable compliance with statutory requirements on reporting and evaluation,
- internal reporting and engagement with OER Council surveys,
- ongoing efforts to make sure the supported activities are accessible, and
- participation in virtual and annual convenings arranged by the OER Council and CDHE.

All institutional proposals must plan ahead to provide requested data and collaborate with institutional partners to provide institutional level data, such as enrollment numbers, pass rates, and number of OER courses. Grantees that do not satisfactorily complete data reporting requirements may result in their institution being ineligible to receive grant funds in future cycles.

Funds awarded that have not been spent by June 30, 2027 must be returned to CDHE.

Grant Timeline

April 2025:	RFP Release
April - May 2025:	Grant informational webinars
September 15 2025:	OER grant proposals due
Fall 2025:	Review of grant proposals
November 2025:	Recommendations for grant awards to CCHE
December 2025:	Award notifications
February 2026:	Funds to be disbursed by CDHE
December 2026:	Progress report due
June 30 2027:	All grant funds must be spent down
July 2027:	Remaining funds returned to CDHE
February 2028:	Final reports due

Note: the timeline above includes some approximations.

For additional information, questions, or to schedule office hours to consult on a proposal, please contact: Chealsye Bowley, Director of Open Education and Learning Innovation, Department of Higher Education at OER@dhe.state.co.us
